

August 27, 2008

Dear Technicote Customer :

Effective Monday, September 15, 2008 Technicote will begin adjusting the freight fuel surcharge monthly, based on the United States average cost of diesel fuel as published by the Department of Energy (DOE). These diesel fuel prices are updated every Monday by DOE. The table below will be used to calculate the freight fuel surcharge that will be applied to customer invoices.

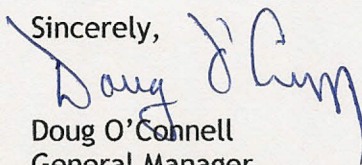

On August 18, 2008, the price of diesel fuel was \$ 4.207/gallon, so the Technicote freight fuel surcharge, based on this new policy, will be \$ 0.006/ MSI. This will be applied to invoices starting September 15, 2008. At the beginning of each month hereafter, the freight fuel surcharge will be calculated by this sliding scale based on the published price on the last Monday of the month. The current customer freight fuel MSI surcharge can be found on Technicote's web site at [www.technicote.com](http://www.technicote.com).

The prolonged high cost of fuels worldwide make this policy necessary, and we ask for your continued understanding as we strive for lower costs in all aspects of our business.

We appreciate your business and will continue to exhaust all areas to contain costs.

Sincerely,
