Technicote's 2.6 mil Techni-Sheen White TC Polypropylene is a white opaque, topcoated, biaxially oriented (BOPP) film that may be used in a wide variety of pressure sensitive label applications. The cavitated polypropylene core is treated one side with a print receptive gloss coating for superb ink adhesion, and has great stiffness for efficient dispensability. The highly treated adhesive bonding layer on the reverse side allows the film to be coated with both permanent and removable adhesives. Economically priced, typical markets where this product is used include Health & Beauty Aids, Beverage, Household, and more!
