

Chemical Drum Labels

Trusted materials specially designed to withstand the most extreme environments

Technicote offers a proven selection of pressure sensitive label products recommended for chemical drum and barrel applications. These materials are composed of the most durable film substrates which are designed to withstand harsh weather and environments such as intense heat, brutal cold, high moisture, dangerous chemicals, UV light and solvents. Our labels retain permanence and legibility—identifying hazardous contents within their containers even through extreme conditions.

Features

- Resistance to chemicals and solvents
- Excellent moisture resistance
- British Maritime BS 5609:1986 Section 2 Certification
- Withstands harsh weather and environments

Print Methods

- UV Flexo
- Water Based Flexo
- Gravure
- Thermal Transfer

Facestocks

- 2 Mil Matte White CP Polyester
- 2 Mil White TC Polyester
- 3.2 Mil C2S Polyart
- 4 Mil Flexible White Vinyl
- 3.5 Mil Techniflex White Polyolefin
- 2 Mil Polyprint

Markets

- Chemical Drums
- Marine Shipment Containers

Support

Technicote provides support through quality service and customer care. Our experienced, customer service and pricing team work hard to be able to identify and respond to customers' needs quickly and efficiently. With over 150 years of combined technical and industry experience, valued technical service specialists will provide you with product recommendations you can trust.

DL400 Adhesive

Our DL400 Adhesive is an aggressive, emulsion adhesive that has been specifically formulated for use in durable label applications such as chemical and barrel drums, lawn and garden equipment, and household and commercial appliances.

It offers outstanding adhesion to painted steel drums, fiber drums and a variety of plastic drums under high moisture conditions, as well as direct exposure to chemicals, solvents, and UV rays.
