

Pearl Polypropylene Labels

Technicote's line of Pearl Polypropylene Label products delivers exceptional solutions for your clients' demands

The demands of many labels, especially prime labels, require durability, fatigue- and moisture-resistance and dimensional stability. Food labels specifically call for solutions that are non-toxic and resistant to acids and solvents. Technicote's Pearl Polypropylene Label products successfully meet all of those demands with 2.3 mil and 2.6 mil options. Plus, the printability, opacity and stiffness create an excellent appearance on shelf—providing your clients with a quality product that stands out in the prime market.

Excellent Value

Don't over-engineer your product. Pearl top-coated 2.3 mil—which uses our multi-layer film with a cavitated core—and Pearl 2.6 mil is an industry leader for a general purpose film. The entire Pearl line delivers value without sacrificing performance.

Outstanding Quality

Pearl products have 80% opacity and a glossy white/pearl look. It provides the stiffness necessary for label dispensing, diecutting and stripping well on press. Pearl offers tremendous printability with water, solvent and UV based inks on flexo, gravure, UV Letterpress and rotary screen printing systems.

Customization and Service

Technicote can customize Pearl Polypropylene Label products for your specific need through unique combinations of facestocks, adhesives and liners. Many are offered trim-free while others are part of Tech25—Technicote's leading custom coat program with roll lengths as low as 2,500'.

Prime Label Applications

The advantages of Technicote's Pearl Polypropylene Label products allow for many possible applications, including:

- Health & Beauty
- Personal Care
- Household Products
- Candles
- Durable Goods
- Food Labels
- Jar & Canning Labels
