

# Ultimate Product Group

Innovative product developments that will redefine high-speed converting

The Ultimate Product Group is a combination of face, adhesive, and liner that allows for a flat release profile across a high range of speeds. This Technicote innovation provides our customers with greater productivity, results and profits.

\* Red marks indicate silicone voids in the liner

CUSTOMER	SPEED WITH COMPETITION	SPEED WITH ULTIMATE	% INCREASE
A	500	900	80%
B	500	800	60%
C	400	550	38%
D	305	460	67%
E	532	900	69%

### Ultimate Productivity

- Interaction between the silicone & the paper allows silicon to soak deeper into the sheet
- Creates excellent silicone coverage, reducing risk of matrix breaks and downtime

### Ultimate Results

Substantial testing at multiple converters has shown that there is a 65% average increase in press speed.

### Ultimate Profits

The Ultimate Product Group increases speed and uptime while decreasing waste which can nearly double profits.

### What products work with the Ultimate Product Group?

We focus on our Direct Thermal & Thermal Transfer products. With the rise in demand for these products with click-and-ship and pharmaceutical labels, and the ever-tighter pressure on costs to you, developing solutions that allow for more efficient and faster press runs was critical to Technicote. There are 24 current offerings of The Ultimate Product Group and Technicote is developing the technology to work across other pressure sensitive products.

FACE STOCKS	ADHESIVES	LINERS
Thermal Transfer	TP-160	40
Direct Thermal Coated	AT-150	50# SCK
Direct Thermal Uncoated	GP-550	
	AT-333
