

Approved Solutions for Tosca RPC Packaging

Tosca reusable plastic containers (RPCs) are an ideal solution when shipping perishables such as eggs, meats, produce and poultry. It is equally important to pair these quality Tosca products with the appropriate labeling. Issues from using non-approved Tosca labels may result in lost customers or supply chain fines. Technicote now offers two Tosca- and IFCO-approved items that will provide the best results for your customers needing RPC solutions.

Tosca RPC benefits include:

-  Protects product quality with stronger packaging
-  Reduces shrink with superior package design over corrugated
-  Lowers labor costs by avoiding unnecessary handling and damage

For more information about our Tosca RPC Products, contact your sales representative or visit technicote.com.
